PROFILE

I am a master's student in Computer Science at KTH. My specialization is data science and machine learning. I've built systems from large-scale scraping and data pipelines to ML models.

EDUCATION

MSc Computer Science · KTH Royal Institute of Technology 2026 – present
Data Science track with a machine learning specialization.

BSc Media Technology · KTH Royal Institute of Technology 2023 – 2026
Bachelor's thesis: Matjakt (see Projects).

EXPERIENCE

Data Annotation Intern · Stealth AI startup Aug 2026 – present

- Annotate video data used to train real-time machine learning models.
- Review other annotators' work for quality and consistency against labelling guidelines.
- Help evaluate model performance, feeding results back into data and annotation priorities.

Web Developer · Bolagsrättsligt Forum 2021 – 2026

- Built the company's website (bolagsrattsligtforum.se) from the ground up for its continuing-education courses in company and securities law, including course pages and registration.
- Maintained and updated the site for five years as courses and offerings changed.

B2B Prospecting · Prebona AB, Lisbon Jun 2023 – Aug 2023

- B2B prospecting and cold-email outreach.

PROJECTS

Matjakt — grocery price comparison (bachelor's thesis)
Python · Scrapy · Playwright · PostgreSQL (Supabase) · React · TypeScript

- With three classmates I built a site that collects 4.3 million prices for 57,000 products across ~500 ICA and Coop stores and finds the cheapest way to buy a whole shopping list.
- Wrote parallel Scrapy spiders (Playwright for bot checks) and an ingestion pipeline with bulk loads into Postgres, append-only price history and re-runnable loads.
- User study with 20 participants of whom 19 said it could lower their grocery bill.
- Demoed to visitors at Tekniska museet in Stockholm.

Student dropout prediction · DM1590 Machine Learning, KTH
Python · scikit-learn · XGBoost · pandas

- Group of four predicting dropout for 4,424 students; compared five classifiers, reaching 0.72 accuracy with tuned XGBoost, and analysed bias and transferability across countries.

LEADERSHIP & INVOLVEMENT

Corporate Relations Manager · Medias Branschdag, KTH (Media Technology career fair) Sep 2024 – Jun 2025

- Responsible for relations with participating companies for the chapter's annual career fair.

Co-Director · "Getmannen", Media Technology Chapter, KTH 2025 – 2026

- Co-directing the chapter's yearly movie with a team of about 20 people.

SKILLS

Programming	Python, SQL, C++, C#, JavaScript/TypeScript
ML / data	scikit-learn, XGBoost, pandas, NumPy, matplotlib
Web	React, Next.js, Three.js, Supabase, Firebase
Tools	Git, Docker, Jupyter, Scrapy, Unity, Claude Code
Languages	Swedish, English
Driver's licence	B (manual)
